2

---

---

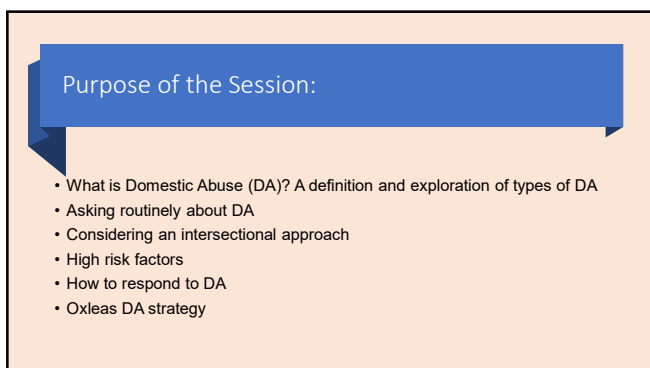

---

---

---

---

---

**Purpose of the Session:**

- What is Domestic Abuse (DA)? A definition and exploration of types of DA
- Asking routinely about DA
- Considering an intersectional approach
- High risk factors
- How to respond to DA
- Oxleas DA strategy

3

---

---

---

---

---

---

---

### Statutory Definition of Domestic Abuse: DA Act 2021

Behaviour of a person ("A") towards another person ("B") is "domestic abuse" if— A and B are each aged 16 or over and are personally connected to each other, and the behaviour is abusive.

Behaviour is "abusive" if it consists of any of the following— physical or sexual abuse; violent or threatening behaviour; controlling or coercive behaviour; economic abuse, psychological, emotional or other abuse.

It does not matter whether the behaviour consists of a single incident or a course of conduct.

4

---

---

---

---

---

---

---

---

### Who does this affect?

Anyone can experience Domestic Abuse (DA) regardless of gender, age, sexuality or ethnicity, however women are more likely to be seriously harmed or die as a result of domestic abuse.

There are some groups of people who are more likely to be victims of abuse including those people who are deaf or disabled, have poor mental health, those identified as LGBTQ+, young people and older people.

5

---

---

---

---

---

---

---

---

### Domestic Abuse Data (known)

Approximately 1 in 15 children under the age of 17 live in households where a parent is a victim of domestic abuse.

Around one in four women aged 16 to 74 had been a victim of domestic abuse in their lifetime, compared with around one in seven men.

It is estimated that the social and economic costs of domestic abuse to be in the region of £78 billion (2022).

2 women a week are killed by their partner (ex partner)

6

---

---

---

---

---

---

---

---

## Economic Abuse

- Limit access to Wifi, phone line, finance for mobile
- Control heating thermostat
- Create debt to impact credit rating
- Take out loans without victims being fully aware
- Refuse to sign papers , unable to move
- Housing in perpetrators name
- Cancel insurance policies including car , so can't drive
- No money for bus or petrol
- Stop child maintenance/ limit money for children's needs
- No pet food/ insurance /vet bills

7

---

---

---

---

---

---

---

---

## Coercive Control

A pattern of acts of assault, threats, humiliation and intimidation or other abuse that is used to harm, punish, or frighten their victim. This controlling behaviour is designed to make a person dependent by isolating them from support, exploiting them, depriving them of independence and regulating their everyday behaviour.

8

---

---

---

---

---

---

---

---

## Coercive Control

10

## Types of Domestic Abuse

- Intimate partner abuse**-most commonly takes place in intimate partner relationships, including same sex relationships.
- Teenage Relationship Abuse** - Teenagers may not self-identify as victims
- Abuse by family members** - may also be perpetrated by a family member: by children, grandchildren, parents, those with "parental responsibility", siblings, or extended families including in-laws
- Child-to-parent abuse** - Also commonly referred to as Adolescent to Parent Violence/Abuse. Can be adult children. Includes abuse toward siblings, grandparents, aunts, uncles as well as other family members such as those acting as kinship carers.

11

12

### 1.1 Oxleas DA Policy 2023

Oxleas NHS Foundation Trust will support staff in the identification and management of Domestic Abuse (DA) issues. The safety of members of staff and service users will be seen as a priority and identification of risk will be a core business for the Trust.

13

---

---

---

---

---

---

---

What can I do?

- It is important that we **ask about DA within assessments routinely** (routine/safe enquiry) when safe to do so.
- Repeated findings from domestic homicide reviews have highlighted that **health professionals can offer patient survivors a safe place to disclose and seek support at an earlier opportunity** (Pathfinder 2020).

14

---

---

---

---

---

---

---

### Identify

- Injuries with poor or no explanation and minimised or concealed injuries.
- A partner or family member who is unwilling to allow the person to be alone with professionals.
- Anxiety, depression and being withdrawn, particularly if this is not usual for the person.
- Increased contact with health professionals with non-specific history.
- Poor engagement with services. This may relate to the trauma the victim has experienced, or being denied access by the perpetrator (including withdrawal or money to travel or telephones).

15

---

---

---

---

---

---

---

Is it safe to ask?

- Is the client alone? This includes children over the age of 2
- Always use an interpreter to ask about DA
- Consider how safe remote access may be

16

---

---

---

---

---

---

---

## ASK

- **Framing your assessment carefully** will ensure you are able to ask all clients about their risk of domestic abuse when safe to do so. All clients may be at risk of domestic abuse and it is suggested that they may need to be asked many times before a disclosure is made.
- **Firstly, normalise your question**  
As we are aware that many people are harmed by those they have a relationship with, such as partners ex partners or family members, so we ask all our clients about their possible experiences.
- **Possible** Questions to ask (this needs to be clear and direct):
- "Has anyone close to you made you feel frightened?"
- "Has anyone close to you ever hurt you?"
- "Does anyone close to you bully you, control you or force you into things?"

17

---

---

---

---

---

---

---

## Ask additional direct questions to adults with care and support needs

- "Has anyone prevented you from getting, food, clothes, medication, glasses, hearing aids or medical care?"
- "Has anyone prevented you from being with the people you want to be with?"
- "Has anyone tried to force you to sign papers against your will?"
- "Have you been upset because someone talked to you in a way that made you feel ashamed or threatened?"
- "Has anyone taken money belonging to you?"
- If someone has an injury asking them "Did someone do this to you?" is more likely to support disclosure than a more general question such as "How did you hurt yourself?"

18

---

---

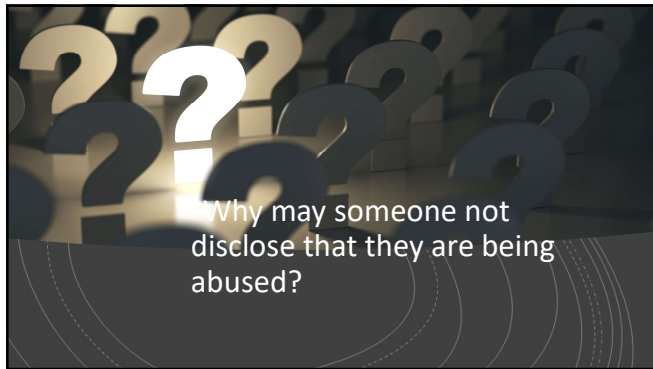

---

---

---

---

---

19

---

---

---

---

---

---

---

---

20

---

---

---

---

---

---

---

---

21

---

---

---

---

---

---

---

---

## Assess- High risk factors

- Recent separation or intention to leave
- Pregnancy or young child
- Escalation of abuse
- Cultural isolation
- Threats to kill (self or victim/family)
- Use of weapon
- Stalking or harassment (Harassment includes repeated attempts to impose unwanted communications and contact upon a victim in a manner that could be expected to cause distress or fear) sexual abuse, threats to kill or strangulation.
- If trained and confident to do so, complete a Safelives/DASH risk assessment to support professional judgement of risk

22

---

---

---

---

---

---

---

---

## Think family

- Are children present, names, ages. Are they in regular contact or living in the family home?
- Children are victims of DA by either being directly harmed by the perpetrator of the abuse, or by the harm caused by witnessing the abuse of others (even if not seen) (DA Act 2021).
- Always consider needs of family members within risk assessments.
- [Follow Oxleas' safeguarding children policy](#) to ensure children remain safe from harm (Children Act 1989, Working Together to Safeguard children 2023).

23

---

---

---

---

---

---

---

---

## Act

If the situation is urgent (risk of immediate harm) - call 999

Follow the trust safeguarding adult and children policies to ensure the victim and family are safe from harm.

Do not tell the victim to leave as they are at most risk of harm when leaving the perpetrator.

Check if they are safe to go home as refuge provision may be needed (via DA services)

Choice – survivors are supported in taking control of their lives. The first step is enabling survivors to choose how they access the support that is offered. Empowerment

24

---

---

---

---

---

---

---

---

## Refer

- If high risk refer to MARAC (Multi Agency Risk Assessment Conference). If unsure call the local DA service provider or Oxleas Safeguarding Team (01322625009)
- Direct or refer victim/perpetrator (if safe to do so) to local DA services for further support.
- Follow adult /children safeguarding processes (section 42, Care Act ) MASH referral (Multiagency safeguarding hub/ LA front door
- Follow up disclosure to ensure the person has accessed the support required.

25

---

---

---

---

---

---

---

## Record

- Practitioners must not reinterpret or reword the experience of domestic abuse victims. They must use the person's own words to describe what they have said has happened (adult and child)
- Practitioners must not use language such as 'claims or alleges' when a person reports domestic abuse. To do so minimises and diminishes the experience of the adult and child living with the impact and trauma caused by abuse. While it is for the court to determine the facts, it is important that practitioners set out exactly what has been said . Record **"he/she /they told me"**

26

---

---

---

---

---

---

---

## Oxleas response

- Resources easily available on the Ox (link)
- Staff DA guidance handbook
- Updated DA policies including staff DA policy (posters)
- Training /updates for all staff
- Embedded routine enquiry
- Posters in client facing areas for access to DA service details
- MARAC review
- DA Champions network (Diversity and Inclusion, voice of lived experience)

27

---

---

---

---

---

---

---

## Feedback from victim of DA

- *Ex Oxleas employee feeding back on her experience*
- "I had lost lots of weight and was unwell".
- Colleague reflected "I know you're not OK" and listened. She told our line manager who was also able to provide support.
- Supported to access local DA services- legal advice, housing, rights.
- "Work was my safe space" "I knew I could talk to someone."
- "I don't know how I would have survived without it" referring to work/team.
- "I'm now in a good place".

28

---

---

---

---

---

---

---

---

## Looking after yourself

- Be aware of your own needs. If you have experienced or know someone who has experienced DA this can impact on your own feelings and wellbeing and potential ability to help (re traumatising).
- Use supervision for emotional support and planning.
- Access local DA services, CIC, HR as needed.

29

---

---

---

---

---

---
